

The import of UUID participants before starting the competition

These configurations ARE MADE AT THE BEGINNING OF THE COMPETITION FOR ADDING UUID CARDS IN THE SOFTWARE, WHICH WILL CALCULATE THE RANKING, you can add new UUID also at a later date.

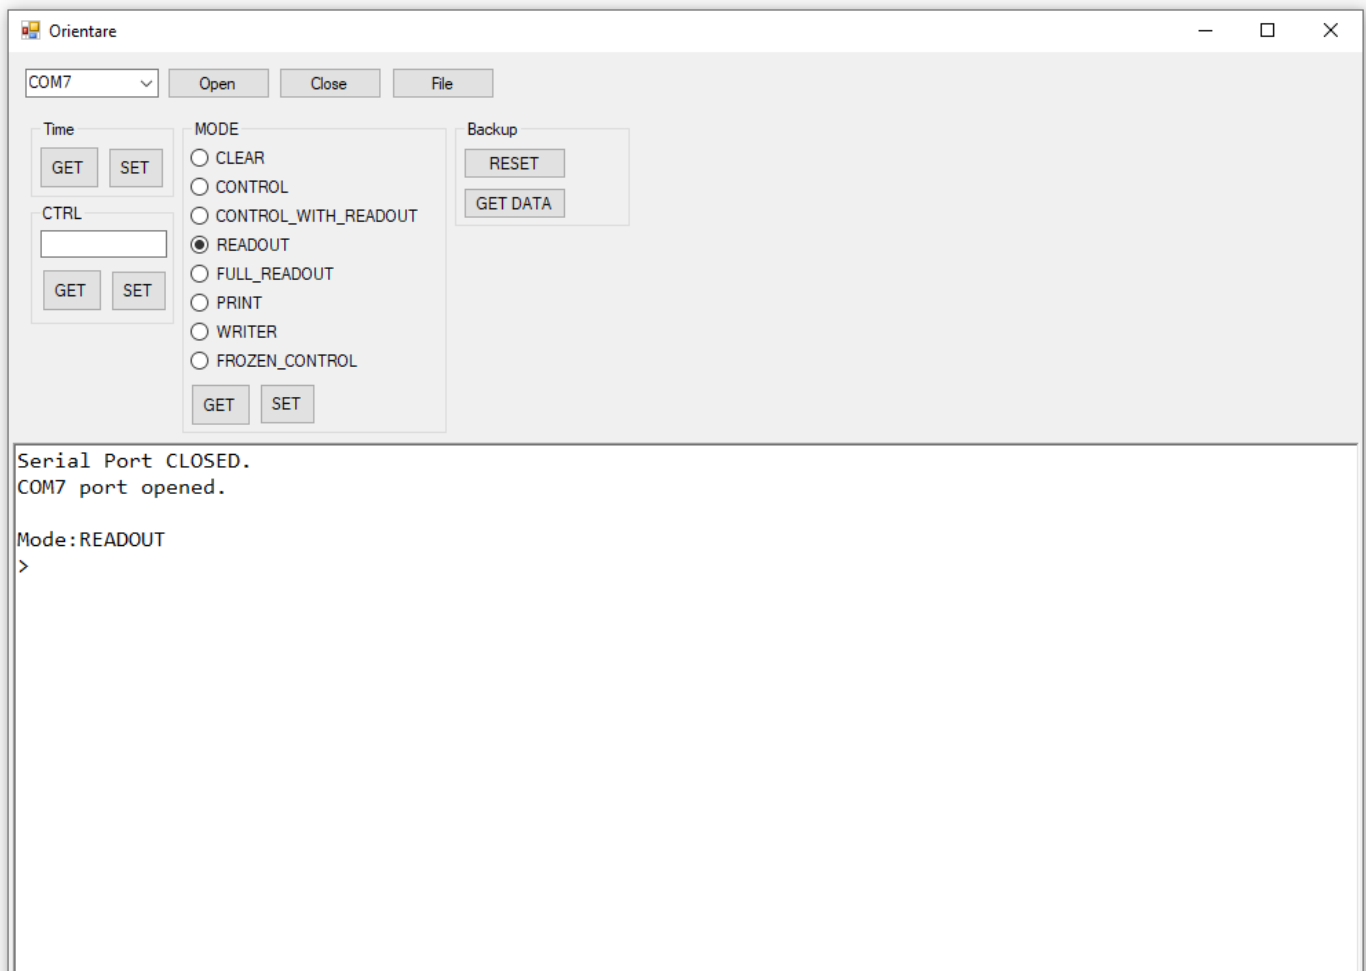

To import the uuidcard in the rankings software you must follow the next steps:

Step 1:

Open the Orientare.exe from CheckPointSoftware\Orientare\bin\Release

And configure the Station as follows:

- Open > Mode Readout > SET
- Press File button and select the location where the log will be save.

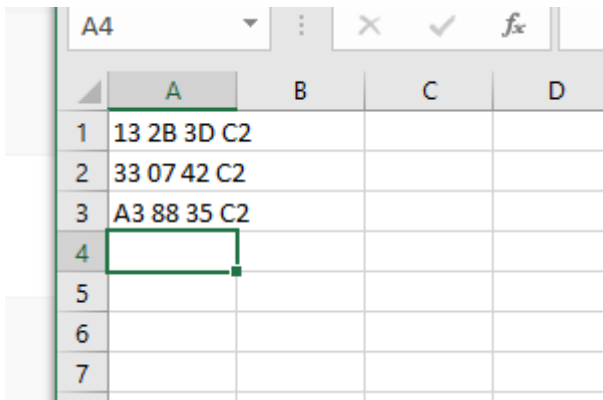

Step 2:

Approaching each card (clock) and you will obtain a screen as below:

```
Serial Port CLOSED.  
COM7 port opened.  
  
Mode:READOUT  
>Card: 13 2B 3D C2  
%  
  
Total: 0seconds - 00h:00m:00s  
>
```

After that we copy the Card ID: **13 2B 3D C2** to a xls file:

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D
1	13 2B 3D C2			
2	33 07 42 C2			
3	A3 88 35 C2			
4				
5				
6				
7				

Where the row is the NUMBER of the card (clock) and the A column is the UUID CARD.

Remember!!! You need to know what is the number of each Card (clock), because you need to write the number on the clock, to be easy to assign it.

STEP 3:

Import the UUIDCARDS (the xls created file) in Ranking Software.

- Open the UltraOrienteering Ranking Software and go the UUID CARDS section and import the UUIDs

UUID Cards Administration

UUID Cards List

No UUID Cards in database, please import

Upload UUID Cards from xls, xlsx, csv

Browse... No file selected.

Import File

Download UUID Cards from Database

Download Excel xls

Download Excel xlsx

Download CSV

Remove all data from software (reset)

DROP DATA

Click on the IMPORT FILE and upload the file.

At the end you will have:

Show 10 entries

Search:

Number	UUID CARD	Actions
1	#1 (13 2B 3D C2)	Edit
2	#2 (33 07 42 C2)	Edit
3	#3 (A3 88 35 C2)	Edit
Number	UUID CARD	Actions
