

**The MANUAL of
ULTRA Orienteering
Rankings SOFTWARE
VERSION 2.0**

Intro

The administration of clubs and participants is no longer a problem when organizing an event. With this software, you can easily manage an event that is developed in a single day or during several days.

Ultra Orienteering allows you to make your own professional tracking and timing system that you can change according to your own needs. The documentation as well as the schemes to achieve control and verification stations are free.

Now you can use Ultra Orienteering Software only for two types of competition:

- **Standard** (where the participants compete individually).
- **Relay** (where the participants compete as a team).

Ultra Orienteering software is used with checkpoints which can be done very easily using the documentation from the site. Ultra Orienteering is an open source project.

Currently, you can use software with a maximum of 125 checkpoints, enough to organize a complex sports competition where the participants can compete individually or as teams.

Each checkpoint is programmable and can be changed as desired (the source code for each job can be downloaded from the [Downloads](#) section). You can add a mini-printer to the software, each participant will receive a log with the route and the timing.

The import of UUID participants before starting the competition

These configurations ARE MADE AT THE BEGINNING OF THE COMPETITION FOR ADDING UUID CARDS IN THE SOFTWARE, WHICH WILL CALCULATE THE RANKING, you can add new UUID also at a later date.

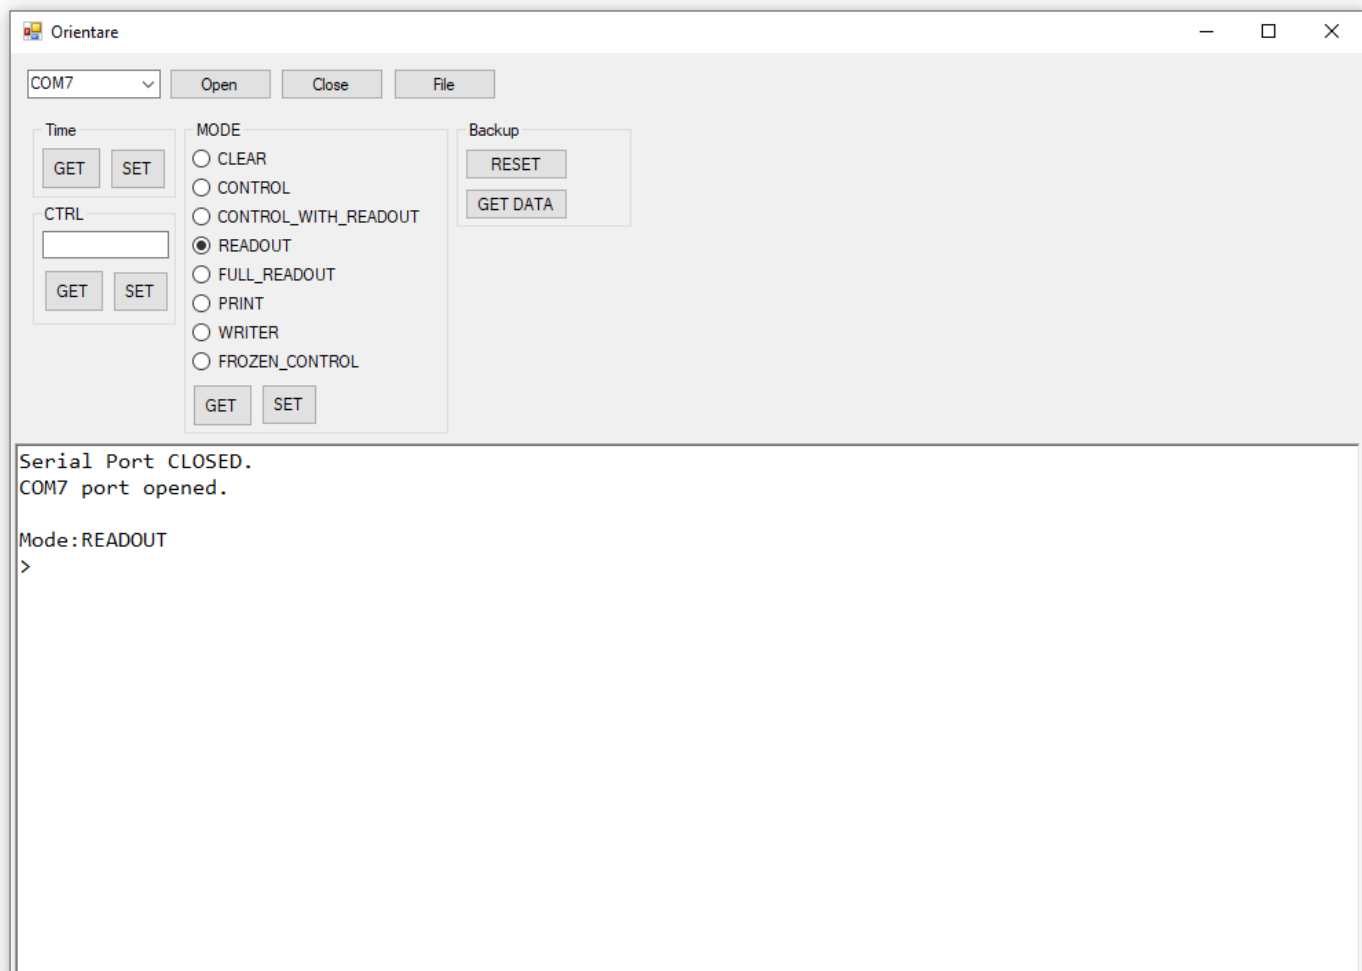

To import the uuidcard in the rankings software you must follow the next steps:

Step 1:

Open the Orientare.exe from CheckPointSoftware\Orientare\bin\Release

And configure the Station as follows:

- Open > Mode Readout > SET
- Press File button and select the location where the log will be saved.

Step 2:

Approach each card (clock) and you will obtain a screen as below:

```
Serial Port CLOSED.  
COM7 port opened.  
  
Mode:READOUT  
>Card: 13 2B 3D C2  
%  
  
Total: 0seconds - 00h:00m:00s  
>
```

After that copy the Card ID: **13 2B 3D C2** to an xls file:

	A	B	C	D
1	13 2B 3D C2			
2	33 07 42 C2			
3	A3 88 35 C2			
4				
5				
6				
7				

Where the row is the NUMBER of the card (clock) and the A column is the UUID CARD.

Remember!!! You need to know what is the number of each Card (clock), because you need to write the number on the clock, to be easy to assign it.

STEP 3:

Import the UUIDCARDS (the xls created file) in Ranking Software.

- Open the UltraOrienteering Ranking Software and go to the UUID CARDS section and import the UUIDs

4. Stages

The stages of the event: an event can be organized during one or several days.

The stages section allows you to add the number of the stages. In our case there will be two stages (Day 1, Day 2).

Stages <small>list</small>		Dashboard > Stages		Add a new Stage	
Stage Name				Actions	
Ultra Orienteering Competition				Edit Delete	

The stage name (stage) can be edited at any time, automatically it will be updated throughout the program.

There can be added new placements at any time, but at least one stage (a stage) is required to be added.

4.1.Adding a new stage

Click on the button „**Add a new Stage**” and enter the name of the stage; after this press **Save**.

Add a new Stage

Stage Name

Close

Save

4.2.Editing the Stage

You can edit the name of the stage anytime; this operation will not remove/reset anything.

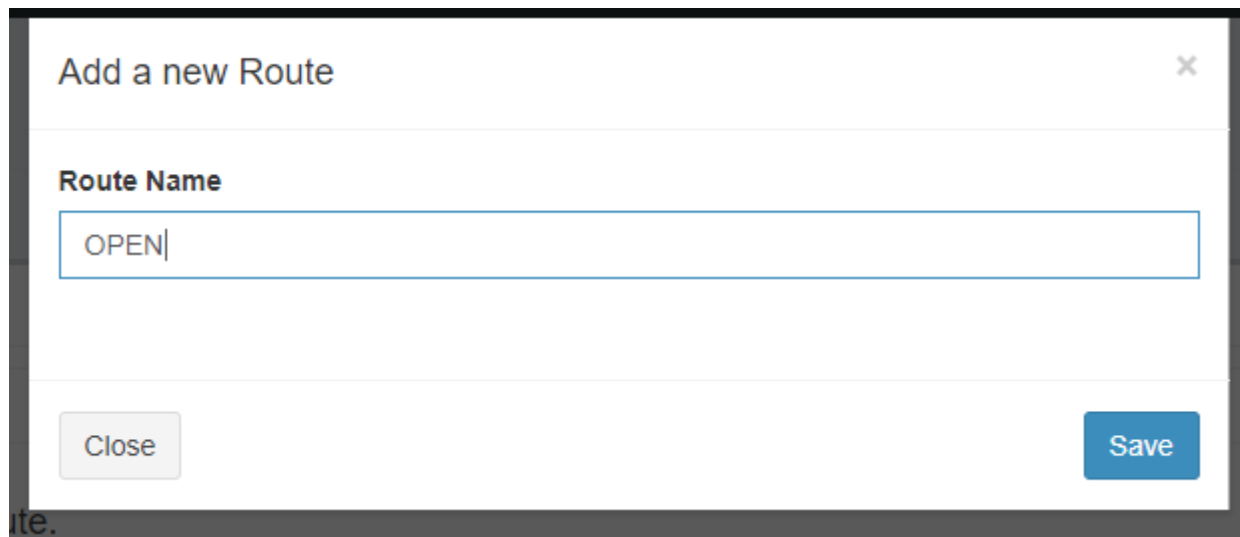

5. Routes

A route is a path / polygon that the participant must go through.

A stage can have multiple Routes. A route will be assigned later to a category.

5.1. Adding a new route

You can add a new route by pressing the "Add a new route" button:

ite.

You will fill in the file „Route Name” with the route name, in our case OPEN.

If you will use the Check Points to organize this competition with this software you need to add the Check Points to this route. What does this mean? A route needs to have Check Points, in our case will add 4 check points.

To add Check Points to a route click on the „Check Points” button.

Route Name		
OPEN		
Manage		Actions
<u>Check Points</u>		Edit Delete

After that you will be able to add the Check Points. Remember to configure your stations with these numbers.

Remember: Start is 251 and the Finish is 252

The other check points will be an integer (ex: 111, 132, 345)

You need to repeat this step for etch participant.

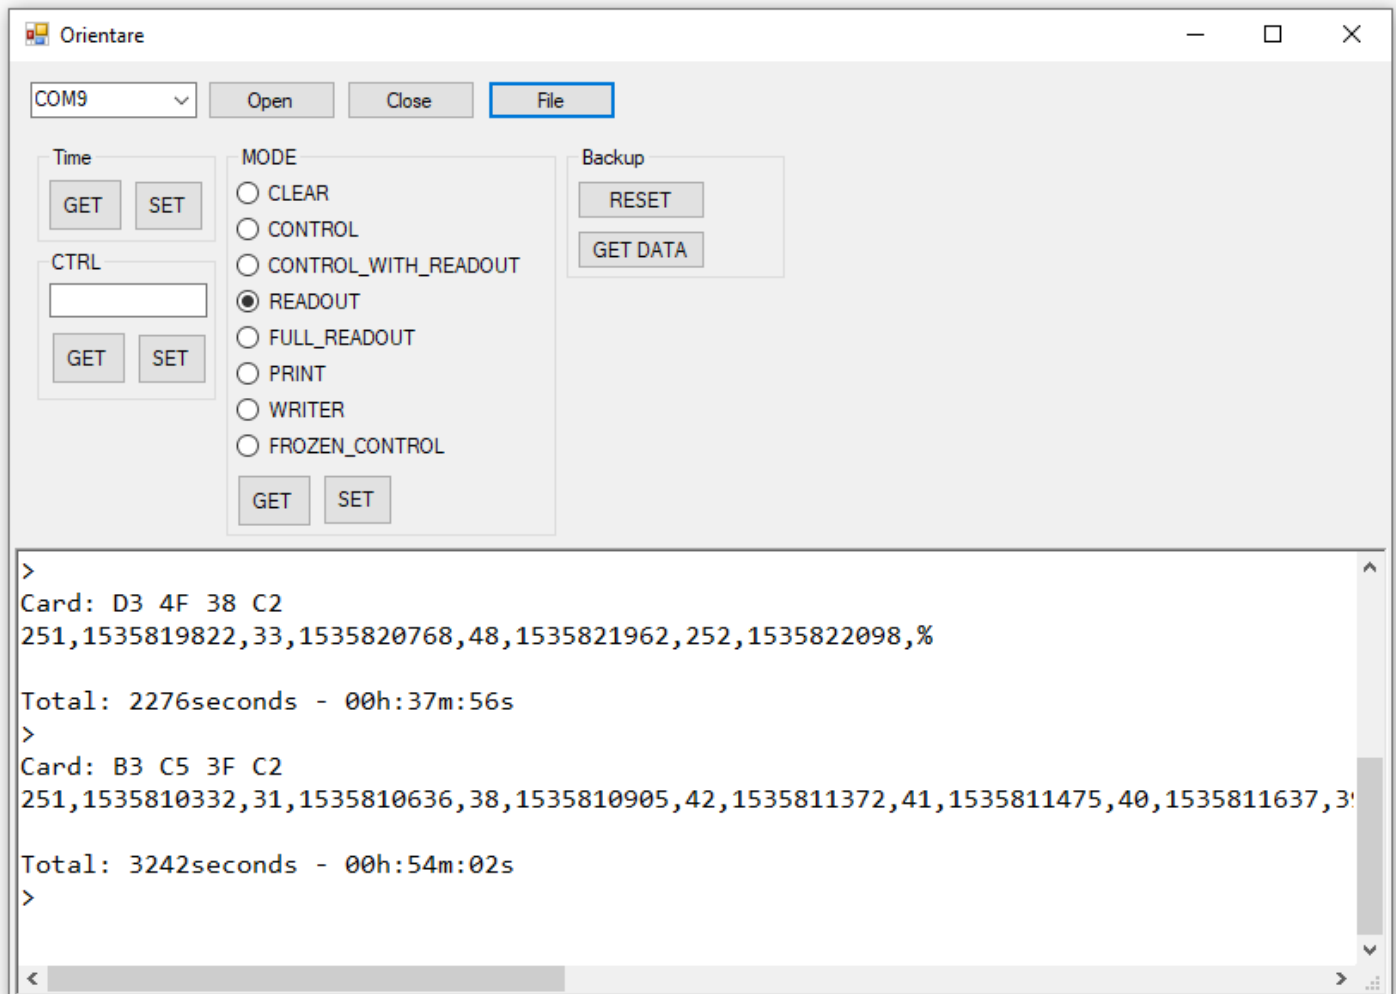

9.2 Import the time/data from clocks using IMPORT LOG SECTION

For this Option you need to use Ultra Orienteering Check Points

With the “**Master**” station in **Readout Mode** you will download all data from each UUI CARD (clock).

See the “How to configure Check Points” manual to understand what the Master station is and how you will configure it if you don’t know.

- Open the Orientare.exe from CheckPointSoftware\Orientare\bin\Release;
- Open the COM for the station;
- Check with GET from the „Mode” section to see if your station is configured as „READOUT”;
- Click on „File” and select the location where you want to save the log file;
- Approaching the card and downloading the data.

After downloading all the data in the file “Stafeta_log3” open it to see what is inside:

The data from the UUID CARDS will look like this:

```
Card: F3 82 36 C2
251,1535800842,32,1535801054,49,1535801130,43,1535801290,42,1535801332,46,1535801544,48,1535801670,252,1535801731,%
Card: F3 82 36 C2
251,1535800842,32,1535801054,49,1535801130,43,1535801290,42,1535801332,46,1535801544,48,1535801670,252,1535801731,%
```

For each UUID CARD (clock) you will have: Point Number, Unix time. Remember 251 is Start and 252 is Finish.

Import the File:

- Go in the “Import Log” section
- Select the Stage
- Select the file
- Click IMPORT

Upload File with time log for participants to calculate the ranking

Stage

Ultra Orienteering Competition

File input

Choose File

Stafeta_log3

Upload the text file with the time log for participant.

Import

After that wait until the import is finished:

Participant	UUID Card	Category	Missed Post	Order Posts
Alexandru Canavoiu (Asociatia Drumetii Montane)	Nr #3 (A3 88 35 C2)	OPEN	NO	OK
Marian Popescu (Asociatia Drumetii Montane)	Nr #2 (33 07 42 C2)	OPEN	Yes	Post: 251 - Time: 11:20:42 Post: 20 - Time: 11:25:30 Post: 40 - Time: 11:28:10 Post: 41 - Time: 11:28:52 Post: 50 - Time: 11:32:24 Post: 252 - Time: 11:35:31

As you can see in this image with “Green” all check points are correct and the “Red” one has missed Check Points. In our case “10” and “30” and one check point is incorrect “50”.

From the **Import Log** you have a Journal For Stages, where you can download the journal in pdf format

Journal for Stages	
Stage Name	Actions
Ultra Orienteering Competition	Download

This section will be renewed at each import.

10. RANKINGS

4.2. Editing the Stage

You can edit the name of the stage anytime; this operation will not remove/reset anything.

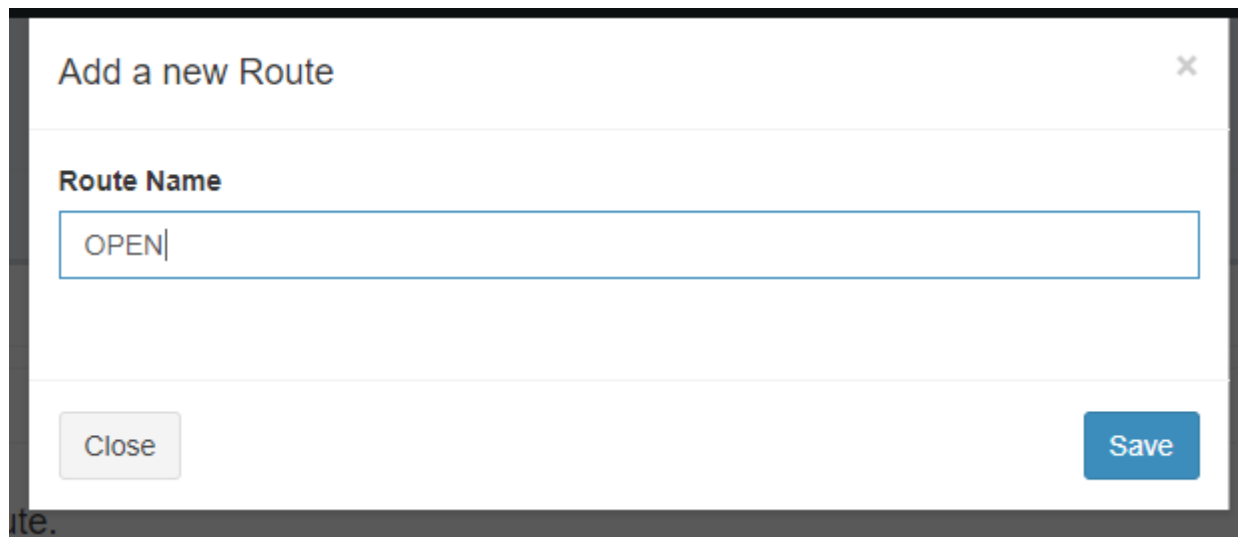

5. Routes

A route is a path / polygon that the participant must go through.

A stage can have multiple Routes. A route will be assigned later to a category.

5.1. Adding a new route

You can add a new route by pressing the "Add a new route" button:

ite.

You will fill in the file „Route Name” with the route name, in our case OPEN 1.

Because your competition will be Relay, each participant needs to have a unique route (the check points can be the same but the name needs to be unique). Add three (3) routes: Open 1 / Open 2 / Open 3 because a team will be formed of 3 people.

If you will use the Check Points to organize this competition with this software you need to add the Check Points to this route. What does this mean? A route needs to have Check Points, in our case will add 4 check points.

To add Check Points to a route click on the „Check Points” button.

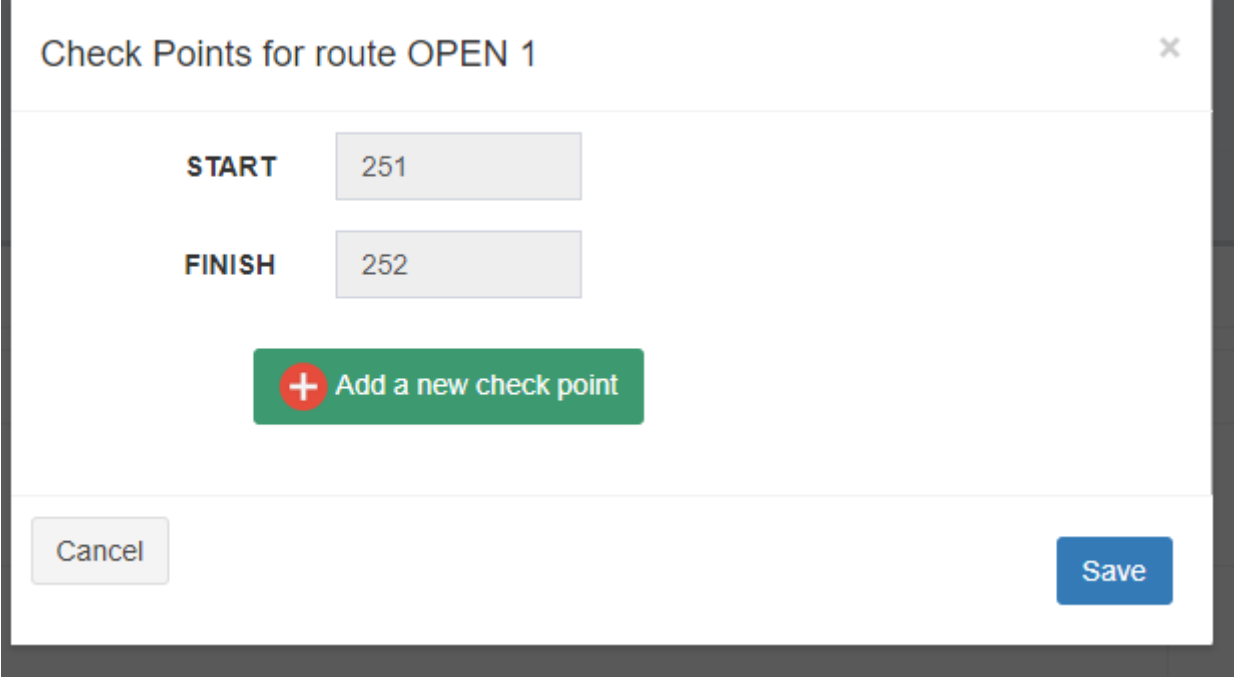

Route Name	Manage	Actions
OPEN 1	<button>Check Points</button>	<button>Edit</button> <button>Delete</button>
OPEN 2	<button>Check Points</button>	<button>Edit</button> <button>Delete</button>
OPEN 3	<button>Check Points</button>	<button>Edit</button> <button>Delete</button>

After that you will be able to add the Check Points.

Remember: Start is 251 and the Finish is 252

The other check points will be an integer (ex: 111, 132, 345). Remember to configure your stations with these numbers.

5.2. Check Points to a route

Check Points for route OPEN 1

No participant added yet! It is a good idea to add a participant.

8.1. Adding a new Participant

- Click on „Add a new Participant” button

The screenshot shows a web form titled "Add a new Participants" with a close button (X) in the top right corner. The form is divided into two main sections for adding participants. The first section is labeled "(1) Participant Name" and contains a text input field for the name and a dropdown menu for the "UUID Card" with the value "No. #1 - 13 2B 3D C2". The second section is labeled "(2) Participant Name" and contains a text input field for the name and a dropdown menu for the "UUID Card" with the value "No. #1 - 13 2B 3D C2". At the bottom of the form, there are three buttons: a "Close" button, a green "Add a new participant" button with a red plus icon, and a blue "Save" button.

In the above image there are fields only for 2 participants and we need to configure a team with 3 participants.

That's why we will click on the "Add a new participant" button to add another one.

Fill in the fields with the following information: Club Name, 3 x Participant Name, 3 x UUID CARD (the clock number).

One team:

Club Name

You need to repeat this step for each participant.

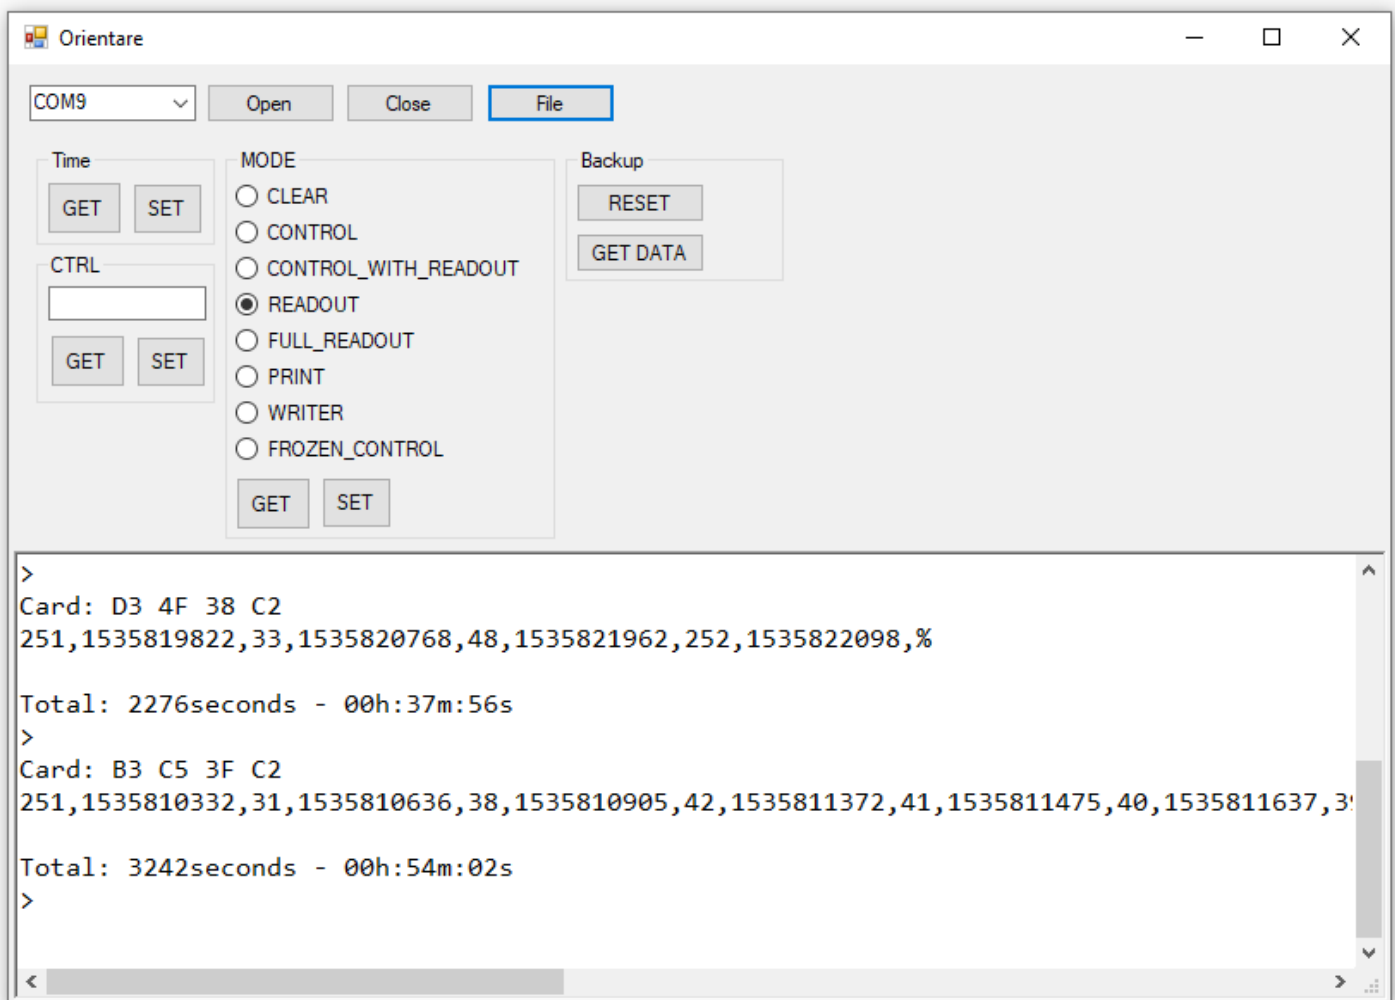

9.2 Import the time/data from clocks using IMPORT LOG SECTION

For this Option you need to use Ultra Orienteering Check Points

With the “**Master**” station in **Readout Mode** you will download all data from each UUUI CARD (clock).

See the “How to configure Check Points” manual to understand what the Master station is and how you will configure it if you don’t know.

- Open the Orientare.exe from CheckPointSoftware\Orientare\bin\Release;
- Open the COM for the station;
- Check with GET from the „Mode” section to see if your station is configured as „READOUT”;
- Click on „File” and select the location where you want to save the log file;
- Approaching the card and downloading the data.

After we downloading all data in the file “Stafeta_log3” open it to see what is inside:

The data from the UUID CARDS will be look like this:

```
Card: F3 82 36 C2
251,1535800842,32,1535801054,49,1535801130,43,1535801290,42,1535801332,46,1535801544,48,1535801670,252,1535801731,%

Card: F3 82 36 C2
251,1535800842,32,1535801054,49,1535801130,43,1535801290,42,1535801332,46,1535801544,48,1535801670,252,1535801731,%
```

For each UUID CARD (clock) you will have: Point Number, Unix time. Remember 251 is Start and 252 is Finish.

Import the File:

- Go in the “Import Log” section
- Select the Stage
- Select the file
- Click IMPORT

Upload File with time log for participants to calculate the ranking

Stage

Ultra Orienteering Competition ▼

File input

Choose File

Stafeta_log3

Upload the text file with the time log for participant.

Import

After that wait until the import is finished:

Participant	UUID Card	Category	Missed Post	Order Posts
Alexandru Canavotu (Asociatia Drumetii Montane)	Nr #3 (A3 88 35 C2)	OPEN	NO	OK
Marian Popescu (Asociatia Drumetii Montane)	Nr #2 (33 07 42 C2)	OPEN	Yes	Post: 251 - Time: 11:20:42 Post: 20 - Time: 11:25:30 Post: 40 - Time: 11:28:10 Post: 41 - Time: 11:28:52 Post: 50 - Time: 11:32:24 Post: 252 - Time: 11:35:31

As you can see in this image with “Green” all check points are correct and the “Red” one has missed Check Points. In our case “10” and “30” and one check point is incorrect “50’.

From the **Import Log** you have a Journal for Stages, where you can download the journal in pdf format.

Journal for Stages

Stage Name	Actions
Ultra Orienteering Competition	Download

This section will be renewing at each import.

5. RANKINGS

Stage Name	Actions
Ultra Orienteering Competition	View Categories Rankings

Click to View Categories Ranking for “Ultra Orienteering Competition”

#	Category Name	No. Participants	Actions
1	OPEN	3	View Rankings

As you seeing is only one category, but you can add more.

Click on the “View Rankings” to see the ranking for this category.

Rank #	Participant Name	UUID Card	Missed Post	Order Posts	Time	Club Name	Total Time
-	Alexandru Canavolu	1	-	-	-	Asociatia Drumetii Montane	Abandon
	Marian Popescu	2	-	Start (11:20:42), P20 (11:25:30), P40 (11:28:10), P41 (11:28:52), P50 (11:32:24), Finish (11:35:31)	00:14:49		
	Cristian Grigore	3	-	Start (11:20:42), P10 (11:24:14), P20 (11:25:30), P30 (11:28:10), P40 (11:28:52), P50 (11:32:24), Finish (11:35:31)	00:14:49
